Save Time by Automating Bank Reconciliation

The Sage MAS 500 ERP Cash Management module improves efficiency by using the power of automation to streamline transaction processing and reconciliations. Cash Management is a key component of Sage MAS 500, a highly reliable, robust, and integrated series of business applications that delivers a flexible, scalable, and full-featured business management solution.

Cash Management enables you to quickly and easily handle and track a wide range of bank transactions—including deposits, withdrawals, adjustments, interest earnings and charges, bank fees, and transfers between bank accounts—with pinpoint accuracy. In addition, the module's extensive drill-down and drill-around capabilities give you fast, convenient access to transaction details and source information.

When integrated with the Sage MAS 500 Accounts Receivable module, Cash Management simplifies deposit generation by allowing you to automatically create deposits in the system when posting cash receipts in Accounts Receivable. Integration of Cash Management with Accounts Payable and Accounts Receivable enables you to access payment and deposit information by bank account, confirm transactions, and import cleared transactions from your bank for automatic reconciliation. Integrate Cash Management with Multicurrency Management, and you'll be able to set up bank accounts in currencies other than your home currency.
